

Name: _____

THE NERVOUS SYSTEM

Topic 2: Central & Peripheral Nervous Systems

Create a flowchart in the space below detailing the organization of the nervous system:

The Peripheral Nervous System

The PNS consists of nerves which link the brain and spinal cord to the rest of the body. List and explain the role of the two main divisions of the peripheral nervous system:

1)

2)

Name: _____

Complete the following table comparing the sympathetic and parasympathetic response of the autonomic nervous system:

	SYMPATHETIC	PARASYMPATHETIC
Common Name		
Activated During...		
Associated Neurotransmitters		
Effect on Body		

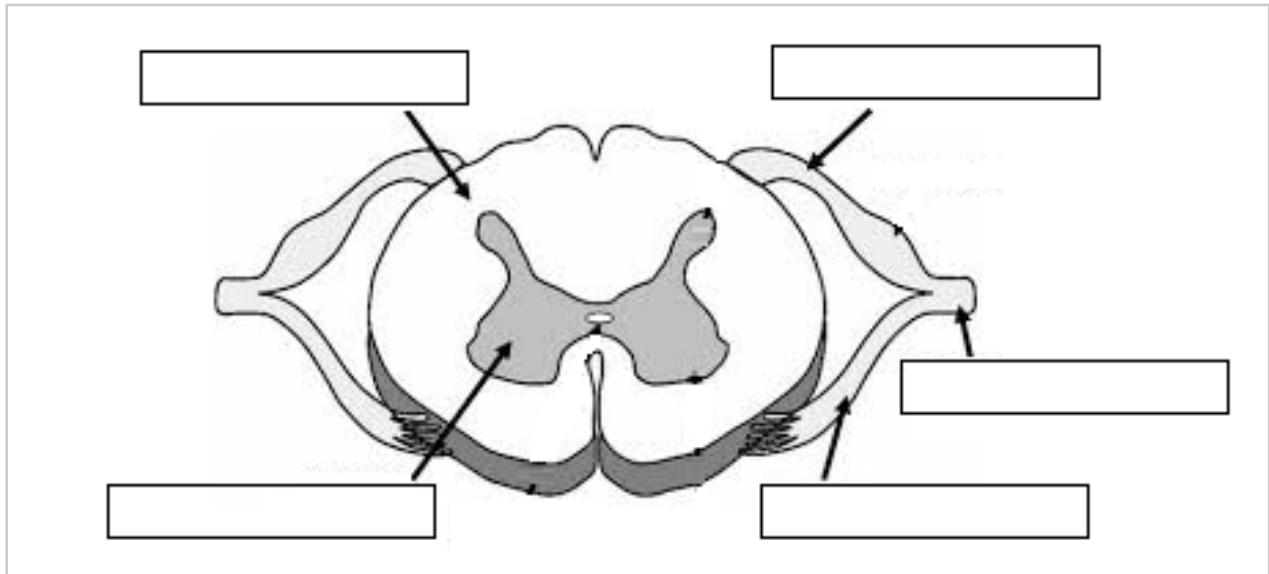

The Central Nervous System

- Composed of the _____ and _____, the central nervous system is the site of neural integration and processing.
- The CNS consists of two types of nervous tissue: grey matter (_____ neurons) and white matter (_____ neurons)..

Name: _____

The Spinal Cord

Sensory neurons contained within the dorsal root carry messages to the spinal cord, and motor neurons contained within the ventral root relay information to effectors...

The Brain

The brain is the center for intelligence, consciousness, and emotion. It also regulates bodily functions without conscious thought (e.g. breathing). Explain the purpose of each of the following structures that surround the brain:

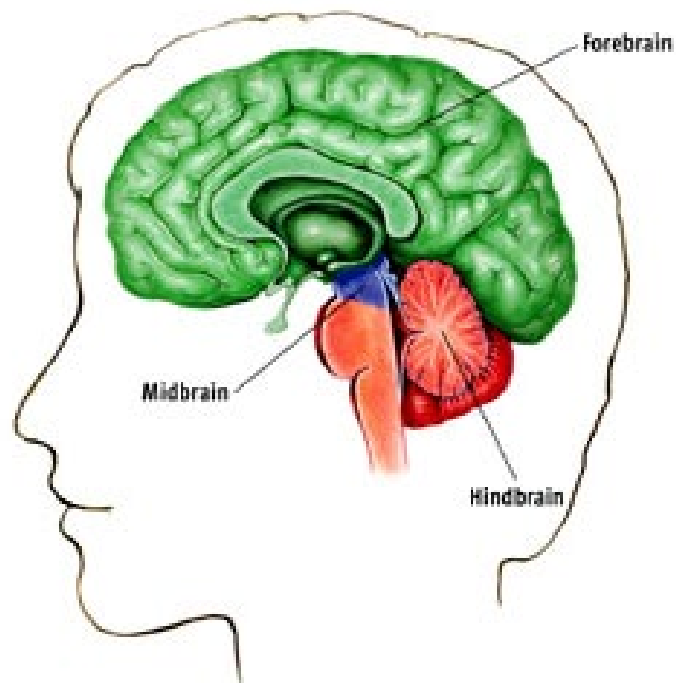

- MENINGES
- CEREBROSPINAL FLUID

Name: _____

Organization of the Brain

	Forebrain	Midbrain	Hindbrain
MAIN STRUCTURES			
GENERAL ROLES			

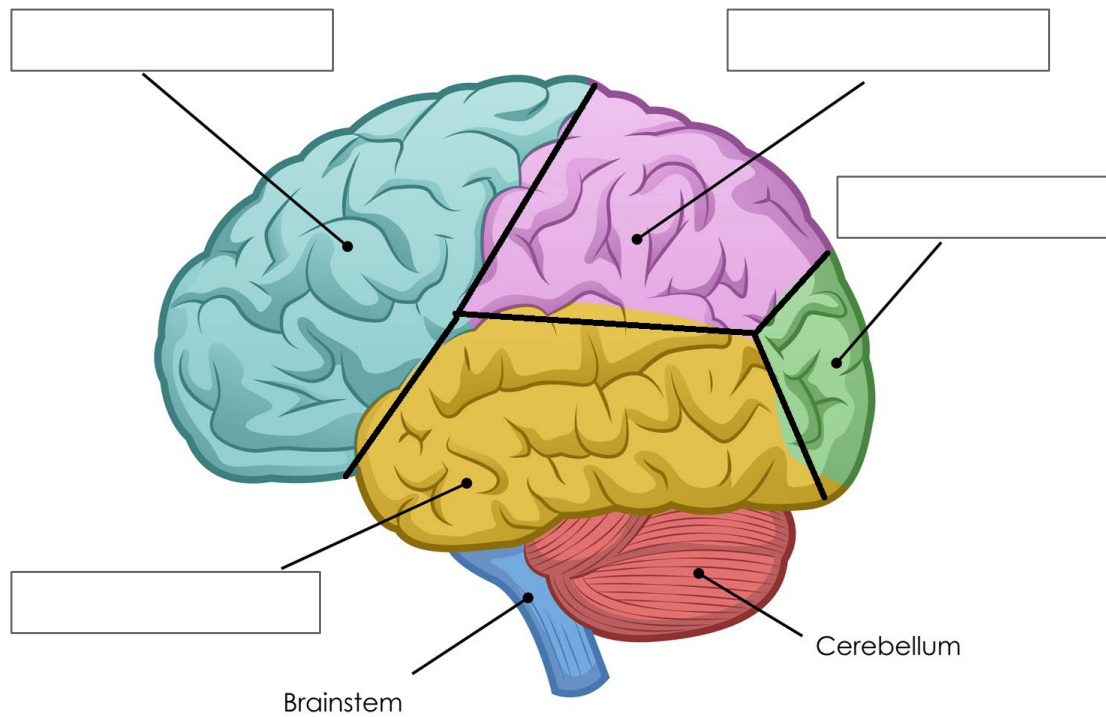

Name: _____

The Forebrain (Cerebrum)

The cerebral cortex or cerebrum is the largest part of the brain. It is divided into left and right hemispheres, and can be further categorized into four main lobes. Label and annotate the main roles of each lobe of the cerebral cortex in the diagram below

Name: _____

- What purpose do the folds in the cerebral cortex serve?

- Discuss the difference between the left & right hemispheres of the brain. Is there any truth to the claim that men and women are “wired differently”?

Name: _____

- _____
- _____
- What is the purpose of the corpus callosum?

- _____
- _____
- _____
- Complete the following table comparing Broca's & Wernicke's Area:

Structure	Function	Aphasia Symptoms
BROCA'S AREA		
WERNICKE'S AREA		

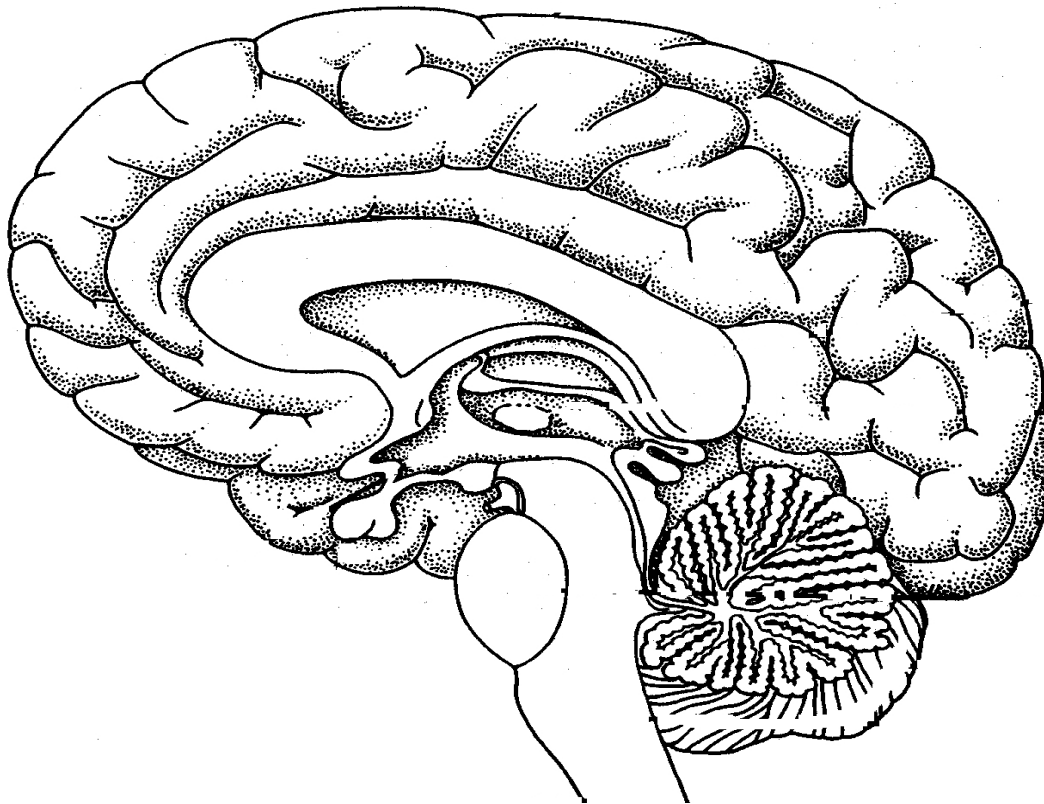

Other Key Structures of the Brain

Label and annotate the function of each of the following other key structures of the brain...

- ☐ Amygdala
- ☐ Hypothalamus
- ☐ Pituitary gland
- ☐ Hippocampus
- ☐ Pons

Name: _____

- ☐ Medulla
- ☐ Reticular formation
- ☐ Cerebellum
- ☐ Thalamus
- ☐ Corpus callosum
- ☐ Cerebrum

h t O

Name: _____
