

Name: _____

REPRODUCTION 2

Topic 2: Hormonal Regulation

Sex Determination

Chromosomal (genetic) sex is determined at fertilization, while anatomic sex is not determined until the seventh week of development...

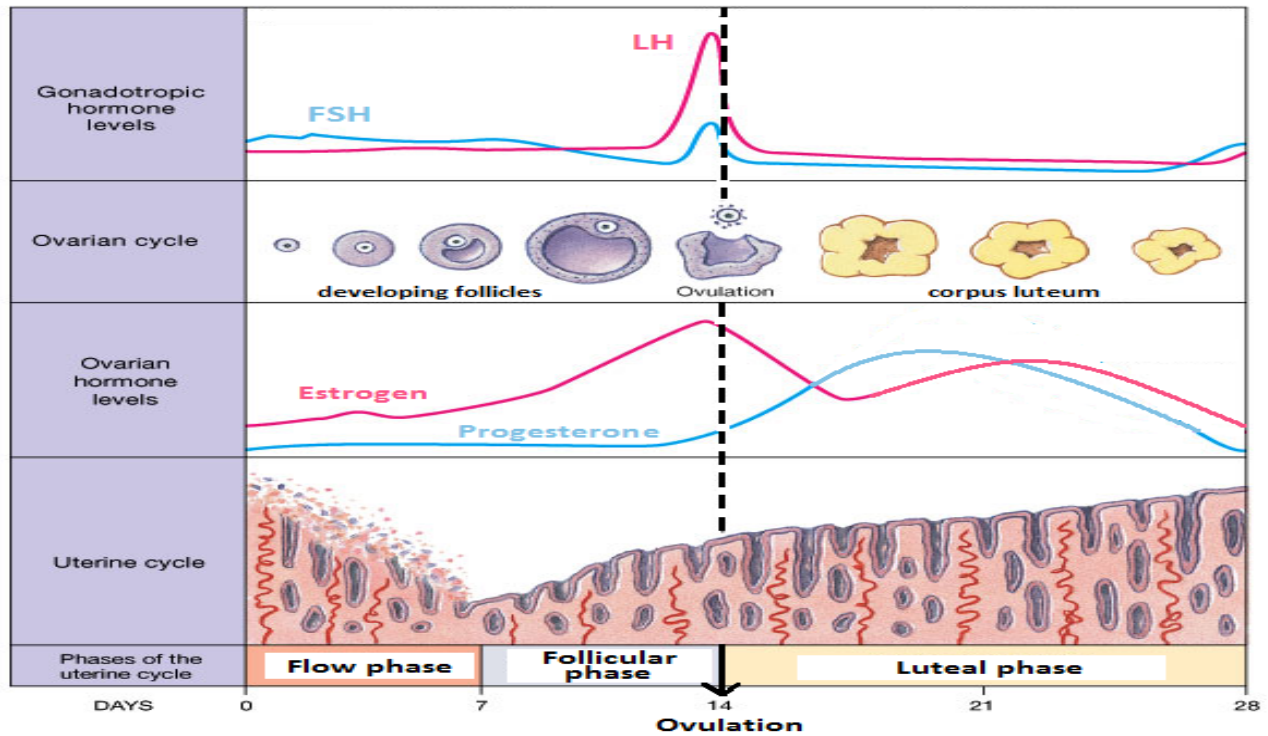

- Explain the difference between chromosomal and anatomic sex.

- What happens at week 7 to determine anatomic sex?

Name: _____

Female Sex Hormones

Summarize the key characteristics of each of the four stages of the menstrual cycle...

1) FLOW PHASE

2) FOLLICULAR PHASE

3) OVULATION

4) LUTEAL PHASE

Name: _____

Complete the following table summarizing the role of FSH, LH, estrogen and progesterone in females:

Hormone	Where it's released from	What causes it to be released	When it's released (days?)	What it does
FSH				
LH				
Estrogen				
Proges terone
